## Installation

## On this page

- Installing DataHub with Resource/Plugin Manager
- Installing DataHub with the plugin source zip file

The recommended way to install the Cameo DataHub plugin is by using **Resource/Plugin Manager**. However, you can install DataHub by using the plugin source zip file.

## Installing DataHub with Resource/Plugin Manager

Resource/Plugin Manager allows you to install a variety of plugins including DataHub under different options.

To install DataHub using Resource/Plugin Manager

- 1. From the MagicDraw<sup>®</sup> main menu, click Help > Resource/Plugin Manager. The Resource/Plugin Manager dialog opens.
- 2. Under the Plugins (commercial) option, select the Cameo DataHub check box.

Add or remove MagicDraw plugins, samples, language packs, profiles, and templates Resource/Plugin Manager allows the addition of extra features and resources from a local file system or over the Internet. Use resource manager to manage plugins, case studies/examples, language packs, profiles, templates, custom diagrams, etc.

3. Click

Download / Install

4. Restart MagicDraw<sup>®</sup> once the download/install process completes.

## Installing DataHub with the plugin source zip file

You can also install DataHub from the source zip file of the plugin if you have downloaded it to your local file system.

To install DataHub from the plugin source zip file

- 1. From the MagicDraw<sup>®</sup> main menu, click Help > Resource/Plugin Manager. The Resource/Plugin Manager dialog opens.
- 2. Click Import to browse the local file system to locate the file.
- 3. After importing DataHub, click Close to close the dialog.
- 4. Restart MagicDraw<sup>®</sup>. The installation will be completed after MagicDraw<sup>®</sup> restarts.

Note installation of DataHub, the DataHub menu items will not be enabled by default. They become enabled only when you open a new or existing project in MagicDraw<sup>®</sup>.
