

Starting Cameo Collaborator

Once the installation and configuration is finished, the server is ready to start.

To launch Alfresco Community with Cameo Collaborator

1. Open Alfresco Community installation directory and double-click the *manager-windows.exe* file.
2. In the **Alfresco Community - 201605** dialog, click the **Start All** button.
3. Wait for 1 to 15 minutes while the server is started and minimize the dialog.
4. In the Address bar, type `<server address>/share/page/` and press Enter. The Administrator Dashboard page opens.

 `http://localhost:8080/share/page/`

5. If Cameo Collaborator is started for the first time, [Apply a license key](#).

After starting Cameo Collaborator, you can:

- [Publish](#) and [review](#) projects
- Create users. For more information, see [Creating a new user](#), [Uploading multiple users](#), and [Configuring LDAP](#) in Alfresco Community Documentation.
