

# Setting the OWL import catalog in MagicDraw

Unknown macro: 'list-children'

The OWL import catalog must be set for a MagicDraw project if an XML catalog is used to import an ontology model.

To set the OWL import catalog to the XML catalog file for the desired external ontologies:

1. Click **Options > Project**.

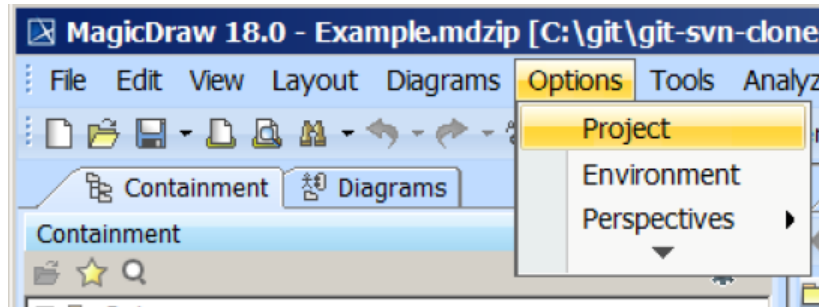

Figure 1: The Concept Modeler's Options menu.

2. Select **General Project Options**.
3. Click in the field next to **OWL Import Catalog**.
4. Click the  button.

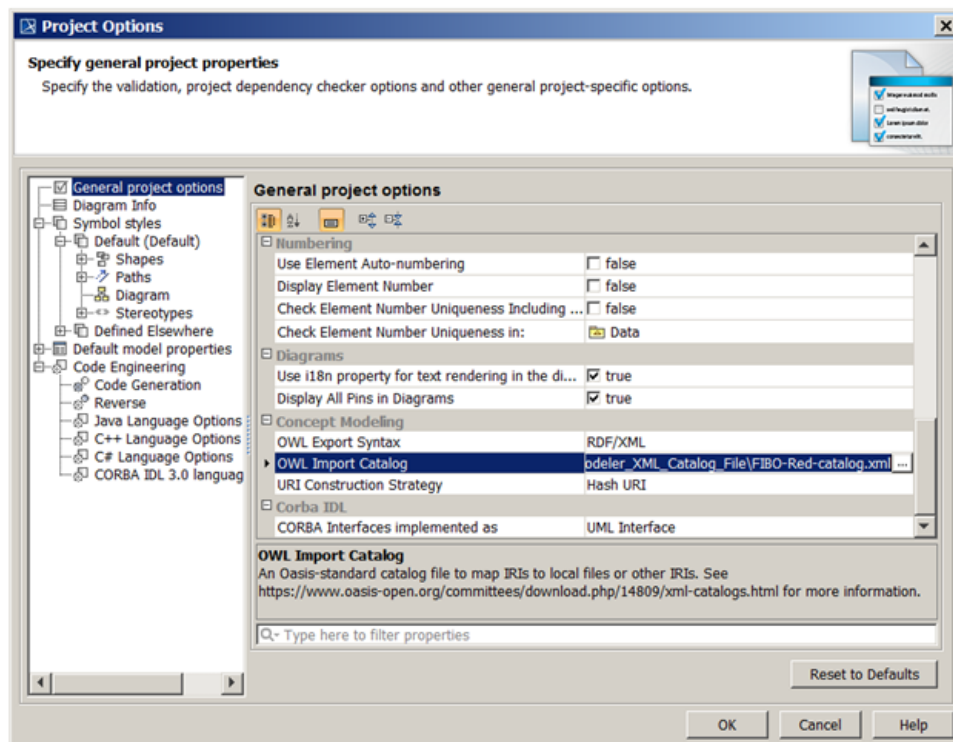

Figure 2: Selecting an XML catalog file as the OWL import catalog.

5. Select the XML catalog file.
6. Click **Open**.
7. Click **OK**.
