You can delete a property chain using the shortcut menus Remove subproperty chain.

To delete a property chain:

---

1. Right-click a target property or a property chain in the diagram pane.

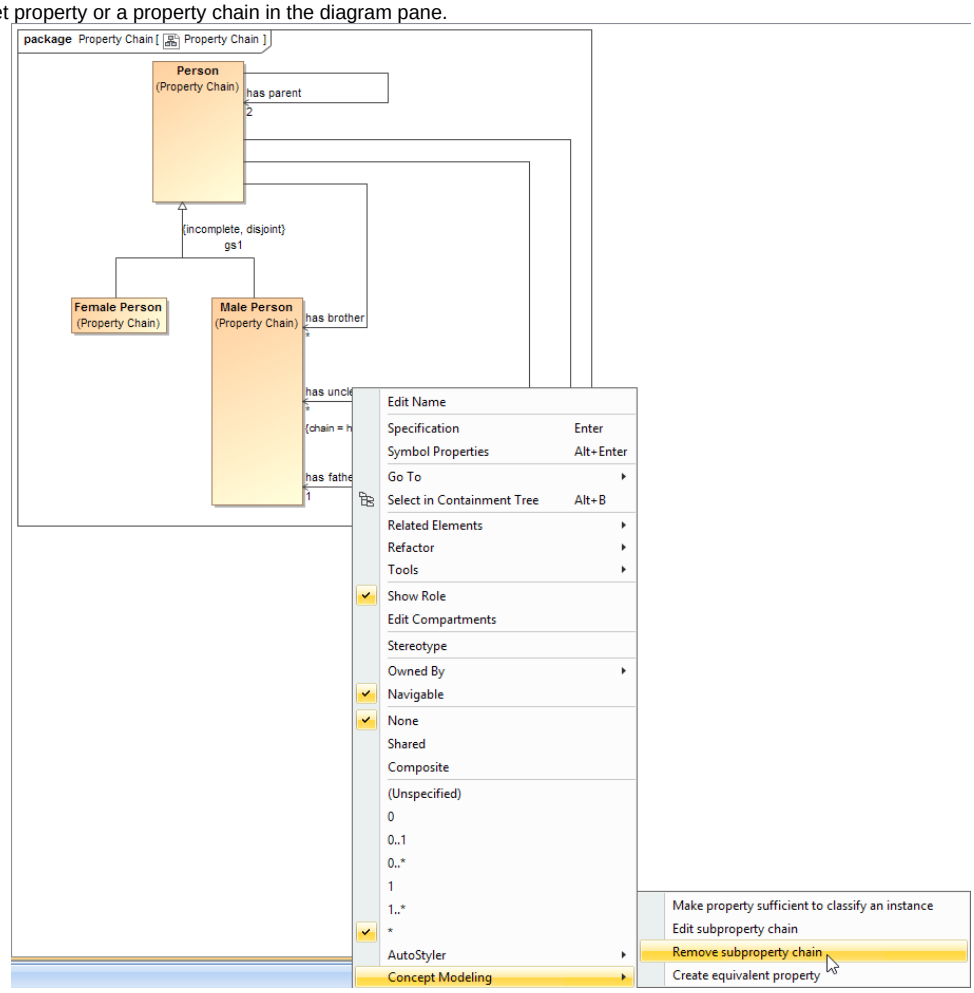

Figure 1: Using the Remove subproperty chain shortcut menu to delete a property chain.

2. Select **Concept Modeling** > **Remove subproperty chain** for the shortcut menu. The Concept Modeler will delete all of the properties in the selected property chain.

> **Tip**
> Alternatively, you can select **Concept Modeling** > **Edit subproperty chain** and delete the property chain by clicking its tagged value > Remove Value in the **Specification** window of the property.
