Creating equivalent classes

Related Concepts:

Unknown macro: 'list-children'

To create equivalent classes:

1. Click [Equivalent Class] on the Concept Modeling diagram palette.
2. In the diagram pane, click on a class and drag the line to another class to make them equivalent to each other. A double-headed arrow will be created between the two classes, and the stereotype **«Equivalent Class»** will be visible.

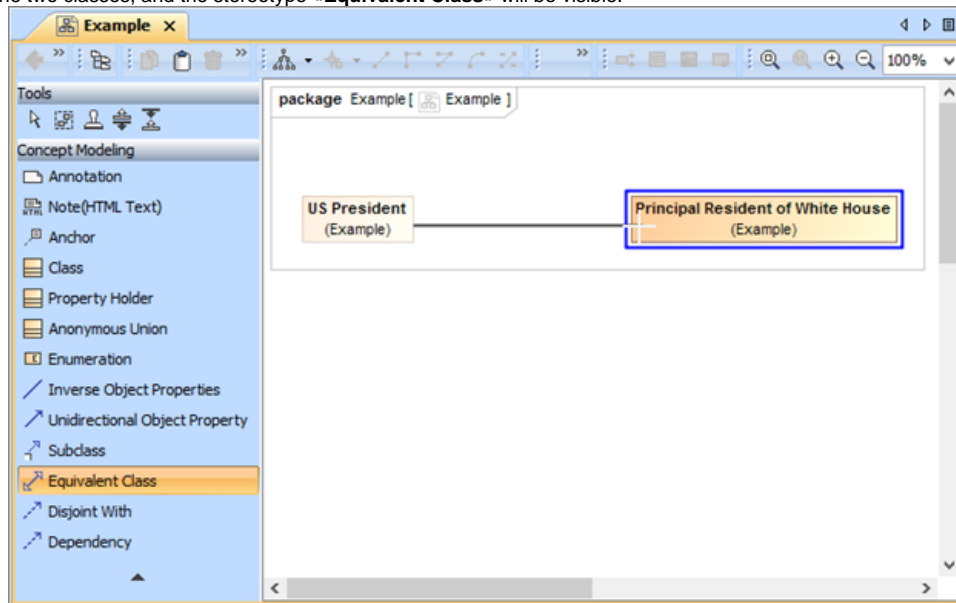

Figure 1: Creating class equivalence between two classes.

Figure 2: The classes "US President" and "Principal Resident of White House" are equivalent to each other.
