Removing roles

You can remove or delete custom roles from Teamwork Cloud Admin (TWAdmin) through the **Role Management** page. Removing a custom role will cause the user, who has been assigned to that role, to be unable to use the permissions associated with that role to work on any resource. The same thing applies to user groups. A user group whose roles have been removed cannot exercise the permissions associated with the roles anymore. The changes will only be effective once the user logs out from TWAdmin. Even though the role has been deleted, the user can still exercise the permissions as long as they stay in the system. But as soon as they log out, the changes apply.

Role Management	
You can use roles to associate users/groups with specific resources or global operations. The table below shows all the roles that are available in the server. Use this screen to create, edit, manage assignments or delete roles.	
😲 Create new role 🔬 Copy Role Assignment Search b	role name × 🔎
Role *	Action
Administer Resources	Edit
Edit Resource Properties	Delete
Edit Resources	Edit 💌
Manage Model Permissions	Edit 💌
Manage Owned Resource Access Right	Edit 💌
Read Resources	Edit 💌
Release Resource Locks	Edit 💌
Remove Resource	Edit 💌
Resource Contributor Resource-specific role. Users who are assigned to this role can modify content of selected resource.	Manage Assignment
Resource Creator Global or category-specific role. Users who are assigned to this role can add resources to the server including the ability to categorize them, create new categories or manage existing one	Manage Assignment
Resource Locks Administrator Resource-specific role. Users who are assigned to this role can release other users locks of selected resource.	Manage Assignment
