Starting Cassandra on Windows

You can start or stop Cassandra the Windows Services panel.

To start Cassandra on Windows:

* Open the Windows Service panel, locate the Apache Cassandra 3.11.2 service and start it.

To stop Cassandra on Windows:

* Locate the Apache Cassandra 3.11.2 service and stop it.

⚠ It is recommended to issue the "nodetool drain" command before stopping the Cassandra service to ensure all data is committed to disk.
