CV-3 Capability Phasing

Description

The CV-3 addresses the planned achievement of capability at different points in time or during specific periods of time, i.e., capability phasing. The CV-3 supports the capability audit processes and similar processes used across the different COIs by providing a method to identify gaps or duplication in capability provision. The CV-3 indicates capability increments, which should be associated with delivery milestones within acquisition projects (when the increments are associated with capability deliveries).

The intended usage of the CV-3 includes:

- Capability planning (capability phasing).
- Capability integration planning.
- Capability gap analysis.

Implementation

CV-3 can be represented using a CV-3 diagram which is realized as a time based diagram.

Capability Name	. 2010		2011	2012	2013
C Land SAR	Land Rescue Unit				<u> </u>
🗆 🔘 Maritime SAR	•				
C Search	👌 Maritime Rescue l	Jnit			Maritime Rescue Unit V2
C Assistance	Maritime Rescue l	Jnit			Maritime Rescue Unit V2
C Recovery	👌 Maritime Rescue l	Jnit			Maritime Rescue Unit V2
C Inform	· •				
C SAR C2	<mark></mark>				
C Distress Signal Monitoring	Monitor Unit				

The CV-3 can be presented as a table consisting of rows representing Capabilities (derived from the CV-2 Capability Taxonomy model) and columns representing phases (from CV-1 Vision model).
