MODAF. StV-5 Capability to Organization Deployment Mapping

Description

The StV-5 defines Capability to Organization Deployment Mapping. It addresses the fulfillment of capability requirements, in particular by network enabled capabilities. This view shows the planned capability deployment and interconnection for a particular EnterprisePhase. This view will provide a more detailed dependency analysis than is possible using StV-3. The StV-5 View is used to support the capability management process and, in particular, assist the planning of fielding.

Implementation

StV-5 can be represented using:

A StV-5 table.

If your project has migrated from any earlier than 17.0.1 version, theold StV-5 View representation based on the UML Class diagram is loaded as the StV-2 Capability Taxonomy diagram.

• A StV-5 spreadsheet report.
