

Creating StdV-2 table

To create StdV-2 table

1. Add resources as table rows by clicking
 - The **Add New** button to create a new resource.
 - The **Add Existing** button to select and existing resources from the model.
2. Add time periods as table columns by clicking the **Time Period** button. In the opened [Time Periods dialog](#) fill in these properties:
 - Select or create a Timeline package to store the Forecast dates.
 - Select the Forecast Kind: Specified Periods, Periodic, Specified Dates.
 - Select Time Periods by clicking  in the Time Periods property value cell.
3. Enter the Standards by clicking  on the cell under time period column. In the **Select Standards** dialog select the Standards to forecast.
4. Specify the date of the Forecast in the [Date and Time Settings dialog](#).

By default the date is the starting date of the selected time period.
