Creating PV-3 matrix

PV-3 Project to Capability Mapping describes the mapping of programs and projects to capabilities to show how the specific projects and program elements help to achieve a capability.

The rows of this matrix are Actual Projects and the columns are Capabilities.

To create a PV-3 matrix

1. Specify **Row Scope** (Actual Projects).
2. Specify **Column Scope** (Capabilities).
3. Click .

Activity is part of Actual Project (Dependency relationship) and a part of Capability (Maps To Capability relationship). This transitive structure of relations maps Capabilities to Actual Projects.

Project has Actual Projects that are related to resources exhibiting capabilities.

Both transitive structures of relations map Capabilities to Actual Projects. The mapping is displayed in the Matrix.
