Working with Strategic States diagram

To create a Strategic States diagram

- 1. Create or select a Desirer (for example, Capability, Operational Performer, Capability Configuration)
- 2. Create or select an Actual State.
- Create a Desired Effect relationship between a Desirer and Actual State.
 Create or select an Achiever (for example, Actual Organization, Actual Resource) to achieve the Actual State.
- 5. Create an Achieved Effect between an Achiever and Actual State.
