

Working with Security Process Flow diagram

A Security Process Flow diagram represents flows of security processes. Before creating this diagram, the Security Process diagram must be created first.

The owner of Security Process Flow diagram is always a Security Control.

To create a Security Process Flow diagram

1. Create Operational Activity Actions or just drop Operational Activities from the Containment tree directly to the diagram pane.
2. Connect Operational Activity Actions with Operational Control Flow or Operational Object Flow.
3. Display the possible Operational Exchanges on Operational Control Flow or Operational Object Flow.
