

Generic table tool

The Generic Table tool allows templates to:

- Access data of the Generic Table.
- Use diagrams to get data from the Generic Table.
- Get the row elements.
- Get the column names.
- Get the cell values.

#	Name	Class	Applied Stereotype	Base Classifier	Visibility	Is Abstract	Is Role	Owned Attribute	Owned Operation	Owned Member	Package
1	a	Data	UML2_Generalization	public	data	role	data	data	data	data	Data
2	Abstraction	UML2_Metamodel	Dependency	public	data						UML2_Metamodel
3	Activity	UML2_Metamodel	Behavior	public	data						UML2_Metamodel
4	b	Data	UML2_Generalization	public	data	role	data	data	data	data	Data
5	Behavior	UML2_Metamodel	Class	public	data						UML2_Metamodel
6	c	Data		public	data						Data
7	Collaboration	UML2_Metamodel	AssociationAction	public	data						UML2_Metamodel
8	Class	UML2_Metamodel	Element	public	data						UML2_Metamodel
9	Class	UML2_Metamodel	Classifier	public	data						UML2_Metamodel
10	Collaboration	UML2_Metamodel	Relationship	public	data						UML2_Metamodel

Figure 1: Generic Table Dialog

Like other Custom Tools, the Generic Table tool '*generictabletool.jar*' must be presented in the 'extensions' folder of the Report Wizard plugin. For further information on Custom Tools and the installation, see section [Custom tool](#).

To import the Generic Table tool to a template, for example, type the following code in the template.

```
#import('generic', 'com.nomagic.reportwizard.tools.GenericTableTool')
```
