#set statement

In Velocity, you can declare a variable and set its value by using the **#set** directive, for example:

```
##String
#set ($var = "abc")
##Boolean
#set($var2 = true)
##Value
#set($var3 = 10)
```

The above example shows that **$var** has a string value, **$var2** has a Boolean value, and **$var3** has a numerical value. The **#set** directive can also set an array to a declared Velocity variable. To assign an array to a variable type, for example:

```
#set($var = ["a", "b", "c"])
```
