

Use Case driven

Report Wizard provides a set of templates to support the Use Case Driven approach methodology. A MagicDraw project that creates the Use Case Driven approach development steps can generate a report to capture elements.

Report Wizard provides 3 templates for the Use Case Driven approach:

1. Use Case Specification Report
2. Method Specification Report
3. Use Case Project Estimation Report

You can create a new MagicDraw project using the Use Case Driven approach either as:

- (i) A blank project with the *UseCase_Profile.xml* module or
- (ii) A Use Case project

(i) How to create a new project as a blank project using *UseCase_Profile.xml*

1. On the main menu, click **File**.
2. Click **Use Module** . The **Use Module** dialog will open.
3. Select the *UseCase_Profile.xml* module.
4. Click **Finish**. The MagicDraw project will apply the **Use Case Description** profile.

(ii) How to create a new project as a Use Case Project

- A MagicDraw project will apply the Use Case Description profile automatically.
