

Content Diagram Wizard

This feature is available in Standard, Professional, Architect, and Enterprise editions.

The **Content Diagram Wizard** generates the content of diagrams used in the project.

To create a content diagram using the **Content Diagram Wizard**

1. Open the Content Diagram Wizard by doing one of the following:
 - On the **Diagrams** menu, select **Diagram Wizards > Content Diagram Wizard**.
 - From the **Analyze** menu, select **Model Visualizer**. In the open Model Visualizer dialog, select to open the **Content Diagram Wizard** and click **Start**.
2. Follow the steps as directed by the wizard.
