

Creating relation map

To create a relation map

1. Select an element, for which you need to create the relation map. This element is the context of the relation map.
2. Do one of the following:
 - From the main menu, select **Diagrams > Create Diagram**. Type “rel” and press **Enter**.
 - On the main toolbars, click the **Create Diagram** button. Type “rel” and press **Enter**.
 - Press Ctrl+N. Type “rel” and press **Enter**.
 - On the **Analyze** menu, click **Create Relation Map**.
 - Right-click the element and from the shortcut menu select **Create Diagram >Analysis Diagrams > Relation Map**.
 - Right-click the element and from the shortcut menu select **Related Elements >Create Relation Map**.

The newly created relation map opens on the right side of the application window.

- The context of the relation map automatically becomes the owner of it when using any of the last two approaches.
- When using other approaches, you can specify another element as the owner.
- The actions relevant for diagrams are valid for relation maps as well.
