# Setting the spell checking options

In the Environment Options dialog, you can change general spelling options and the default language to be checked in the modeling tool, as well as manage dictionaries to be used in the modeling tool.

To change spell checker options

1. On the main menu, click **Options** > **Environment**. The **Environment Options** dialog box opens.
2. In the options group list, select **Spelling**. Spelling options appear to specify in the options list.

Spell checking options are described in the following table:

Property Name	Function
Check Spelling as you type	Underlines incorrectly spelled words and provides a list of suggested corrections in a shortcut menu. For more information about spell check while typing, see Spell Checking as you type.
Check Tagged Values	Checks all tagged values of a string type.
Dictionary	Select language for spelling. All "Open Office" supportive spelling languages can be added to the existing ones. For more information about spelling dictionaries, see Spell checking dictionaries.
Case Sensitive	If *true*, words will differ in meaning based on the differing use of uppercase and lowercase letters.
Use Camel Case Words	If *true*, compound words or phrases in which the words are joined without spaces and are capitalized within the compound, e.g. *BackColor* will be spelled as separate words.
Ignore Upper Case Words	If *true*, words with uppercase words only are not to be spell checked.
Skip Numbers	If *true*, numbers are not spell checked.
