

Zooming

Zooming allows for selecting a particular part of a diagram, zoom in, and make changes while working with a finer level of detail. You can also gain an overview of a diagram by zooming out.

To fit the current diagram in the window, do one of the following

- From the diagram shortcut menu, select **Fit in Window** (shortcut keys Ctrl+W). The same is valid from the **View** menu.
- In the diagram toolbar, click the  Fit in Window button.
- In the Model Browser > **Zoom** tab, click **Fit in Window**.

To zoom in the current diagram, do one of the following

- From the diagram shortcut menu, select **Zoom In** (shortcut keys Ctrl+NumPad + or scroll). The same is valid from the **View** menu.
- In the diagram toolbar, click the  Zoom In button.

To zoom out from the current diagram, do one of the following

- From the diagram shortcut menu, select **Zoom Out** (shortcut keys Ctrl+NumPad - or scroll). The same is valid from the **View** menu.
- In the diagram toolbar, click the  Zoom Out button.

To restore the diagram to the original size, do one of the following

- From the diagram shortcut menu, select **Zoom 1:1** (shortcut keys Ctrl+NumPad /). The same is valid from the **View** menu.
- In the diagram toolbar, click the  Zoom 1:1 button.

To view the selected shapes at maximum size

- Select the shapes and from either the View menu or the diagram shortcut menu, select Zoom to Selection (shortcut keys Ctrl+NumPad *).

To select the zoom settings

- In the **Environment Options** dialog, **Diagram** options group, change the **Zoom Step Size** property. The maximum number is 1.0 (you can zoom a diagram twice.)

 You can also zoom the diagram in or out using the [zoom tab](#) in the Model Browser.
