## Changing the used project version

On this page

- · Setting for notification about version changes
- Updating versions of used projects
- Changing versions of used projects

to change the used project version, you must have an Administer Resources permission.

You can set an option to get a notification when a new used project version appears. You may then choose to update the used project version to the latest version or keep working with the current one.

## Setting for notification about version changes

By default, when you open your server project, you will get a notification if there are used project versions later than the used one in your project. When this notification appears, click the **Update project usages** link and select the projects you want to update in the open **Update Project Usages** dialog.

4	Update Project Usages to Latest Versions	×
	There are project usages that can be updated to the newest version.	
	Update project usages	

When you want to get notifications about updated used projects during your modeling process, you must define used projects for routine version checking.

To get notifications about changes to a particular used project version

- 1. From the main menu, select **Collaborate > Project Usages > Project Usages**.
- 2. Select a used project and click to select the Notify on New Version check box.

You will be notified about updates of selected projects.

You can also choose to check all used project version updates in your server project.

To set notifications about changes to all used project versions

- 1. On the main menu, click **Options** > **Environment** to open the **Environment Options** dialog.
- 2. In the options group list, select Collaboration, then select the Notify About Newer Project Usages option, and specify commands to be notified:
  - on project opening;
  - on project opening;
  - or never.

## Updating versions of used projects

To update the used project version

1. Lock the used project.

2. From the main menu, select Collaborate > Project Usages > Project Usages.

- e 3. Click the Update Project Usages button.
- 4. In the open Update Project Usages dialog, select the project you want to update.
  5. Wait while the version changes to the latest and click OK to close the dialog.

## Changing versions of used projects

To change the used project version

- 1. Lock the used project.
- 2. From the main menu, select Collaborate > Project Usages > Project Usages.
- 3. Select a used project.

Specify project usage options See all project usages in the model. In this dialog, you can add a new used project, modify an existing usage, or update your project usages to the latest versions. To modify an existing usage, select a project on the left side, change its options on the right side, or use the commands in the dialog toolbar. Make sure you lock the project usage for modification.				
	MagicLibrary Requireme	MagicLibrary Requirements

B·· 특정 Java Profile.mdzip B·- 특정 MagicLibrary Requirements	Origin:	twcloud:/5f9234aa-bc67-4b84-9a69-e4e		

- In the open dialog, select the used project version to switch to and click OK.
  Wait while the version changes to the selected one and click OK to close the dialog.

Versions are displayed in the following format: #<used version>/<latest version>.

😡 term #1/3 denotes that 1 is the used version and 3 is the latest version.
