

@see on documentation

This feature only works in the import-code-only mode.

Documentation with doxygen @see tag is reversed with a link to the model. The documentation should use one of the following special doxygen tag to describe an @see element.

- @see
- \see
- @sa
- \sa

The documentation must be in the form of “@see element”. Only one element follows @see will be reversed as an element link in model documentation.
