

«propertyGroup» Properties

Property	Description
Show Group In Compartment Edit	This property allows for displaying the element properties in the Compartment Edit dialog > the Element Properties tab and in a note on a diagram either within the property group/subgroup or without it. If the value is <i>true</i> , the property name is displayed as follows: <code><property_group_name>::<property_name></code> . If the value is <i>false</i> , the property name is displayed as follows: <code><property_name></code> .
Show Group In Element Specification	If the value is <i>true</i> , the property group/ subgroup is visible in the element's Specification window .
Show Group In Go To	If the value is <i>true</i> , the property group/ subgroup is visible in element's shortcut menu as a submenu under the Go To menu.
Show Group In Quick Properties	If the value is <i>true</i> , the property group/ subgroup is visible in the element's Properties panel.
Show Group In Relation Map	If the value is <i>true</i> , the property group/ subgroup is visible in the Criterion Editor dialog, when you create or edit a Relation Map diagram .
Use As Node	<p>If the value is <i>true</i>, the property group is displayed in a separate tab in the element's Specification window and/ or Properties panel.</p> <p>If the value is <i>false</i>, the property group is displayed as a group in the general (default) pane of the element's Specification window and/ or Properties panel.</p> <div>  Do not set this property value to <i>true</i> for the property subgroup. </div>
Properties	<p>Stores a list of properties that is visible in the property group or subgroup.</p> <div>  Do not set this property value to <i>true</i> for the property subgroup. </div>
Columns	<p>Stores the specified table columns for showing the values of a multivalued property in the element's Specification window, for example, ownedOperation in Class.</p> <div>  <ul style="list-style-type: none"> Do not specify this property, when there is more than one property assigned to the properties group and/ or subgroup, i.e., when there is more than one value added to the Properties property. The property group, to which the multivalued property is assigned, must be specified as a separate tab in the element's Specification window, for example, the Use As Node property must be set to true. </div>
Filter	Stores the element types (UML metaclasses and custom stereotypes) that will be displayed as property values.
