

Fixing links in email notifications

Links in all email notifications are by default incorrect. You can fix them by making appropriate replacements in the global properties file.

To fix the links in email notifications

1. Stop Cameo Collaborator.
 - a. Open <Alfresco Community installation directory> and double-click the *manager-windows.exe* file.
 - b. In the **Alfresco Community - 5.0.d** dialog, click the **Stop All** button.
2. Go to <Alfresco Community installation directory>/tomcat/shared/classes.
3. Open for edit the *alfresco-global.properties* file.
4. Find the block like the following:

```
alfresco.context=alfresco
alfresco.host=127.0.0.1
alfresco.port=8080
alfresco.protocol=http

share.context=share
share.host=127.0.0.1
share.port=8080
share.protocol=http
```

5. Replace the local host address with the server host name in line 2 and 7.
6. Save and close the file.
7. [Start Cameo Collaborator](#).
