

Exchanging values between slot and mathematical environment

Cameo Simulation Toolkit allows you to exchange values between a slot and a Parametric Evaluator through the diagram's **Value Exchange** shortcut menu (see the following picture).

The shortcut menu to Exchange Values with the Parametric Evaluator.

To import a value from the Parametric Evaluator to a slot

1. Right-click a slot in the Containment tree to which you will export a value and select **Value Exchange > Import Value from Evaluator**. The **Value Exchange** dialog will open.
2. Type a variable name that contains the value you want to import and click **OK**.

To export a value from a slot to a Parametric Evaluator

1. Right-click a slot in the Containment tree whose value you want to export and select **Value Exchange > Export Value to Evaluator**. The **Value Exchange** dialog will open.
2. Type a variable name to which you will export the value and click **OK**.
