Deleting schema maps

If a schema map is referenced by a DHLink, it cannot be deleted. You can delete only schema maps that are not referenced by any DHLinks. Deleting a Define Target Type from Attribute Value

mapped schema deletes all defined target types. If you want to delete only some values of the schema, you can delete them in the **Define Target Type from Attribute Value** dialog.

To delete an existing schema map

 Open the Cameo DataHub Schema Map Manager dialog. The Cameo DataHub Schema Map Manager dialog opens. Select a source type that you want to edit its mapping. The default target type appears in the Target Type section. 	
3. Click A confirmation dialog box to confirm the deletion opens. Click	Yes
Cameo DataHub Schema Map Manager	
Cameo DataHub Schema Map Manager The Schema Map Manager allows you to view all of the schema maps in the system and also provides the functionality to edit the mapping of the schema map.	
Source Type	Target Type
Q- Type Filter Text	Q - Type Filter Text
	⊡X MagicDraw
En Est.csv	Untitled1
District Contract Contrac	Class
HP Application Lifecycle Management	
Set a	s Default Deactivate Delete
Select Attribute Delete Schema Map Confirmation Dialog	
test.csv [CSV Name(Readon	? on Rule
Position Surname	
Do not show this dialog again.	Yes No
Edit Save Cancel	
Import Export Close	

A Note

If you delete a schema map that is currently in use, an error message opens, showing that one or more relations are using the deleted schema map. Therefore, you must delete the relations first, and then delete the schema map.
