

# Directions of synchronization

The synchronization direction allows you to choose the direction from which the changes are sent. There are three directions of data synchronization in the dialog of the selected DataHub Explorer operation as follows

- ☒ **Two-way Sync**  
Synchronizations are in both directions.
- ☐ **One-way Sync to MagicDraw**  
The third-party Data Source is always synchronized to the MagicDraw Data Source.
- ☐ **One-way Sync from MagicDraw**  
The MagicDraw Data Source is always synchronized to the third-party Data Source.
