

Editing matrices

You can [create](#) or [remove](#) dependencies directly in an editable matrix. You can [view a list of dependencies](#) associated with a cell in an editable matrix.

To create new dependencies do one of the following

- Double-click an empty cell.
The row and column elements will become the client and supplier elements of the created dependency respectively.
- Right-click an empty cell, select **New Relation** > **Outgoing**, and choose the dependency you would like to create.

To remove existing dependencies do one of the following

- Double-click an existing dependency.
The dependency is removed.
- Right-click an existing dependency, select **Delete Relation**, and choose the dependency you would like to delete.

To review a list of dependencies

1. Select the cell.
2. From the shortcut menu choose **Dependency List**.
The **Dependency List** dialog is displayed.
