Creating SvcV-7 Typical table

To create a SvcV-7 Typical table, do one of the following

- Add new Property Set by clicking the **Add New** button and select the owning element for Property Set. Specify Measurements to the Property Set element directly in the table cells.
- Add an existing Property Set by clicking the **Add Existing** button and select existing Property Sets.

⚠ The created instances are stored in the same location as the Typical Measurements table.
