Creating SvcV-9 table

To create an SvcV-9 table

1. Add resources as table rows by clicking:
    * The **Add New** button to create a new resource.
    * The **Add Existing** button to select and existing resources from the model.
2. Add time periods as table columns by clicking the **Time Period** button. In the opened **Time Periods** dialog fill in these properties:
    * Select or create a Timeline package to store the Forecast dates.
    * Select the Forecast Kind: Specified Periods, Periodic, Specified Dates.
    * Select Time Periods by clicking ⬚ in the Time Periods property value cell.
3. Enter the Subjects of Forecast by clicking ⬚ on the cell under time period column. In the **Select Subject of Forecast** dialog select the Resources, Standards, or Protocols to forecast.
4. Specify the date of the Forecast in the **Date and Time Settings** dialog.

> ⓘ   By default the date is the starting date of the selected time period.
