## **Allocate Activities to State Internal Behaviors**

You can allocate Activities to States in all state diagrams. Activities allocation in the UAF profile works in a similar way as in SySML.

To allocate an Activity to a State

- 1. Select an Activity, drag and hold it over the State shape in the diagram.
- 2. When the tool-tip appears, release the mouse button. The context menu appears.
- 3. Select one of the following:

  - EntryDo Activity
  - Exit
