

Actual Resources Connectivity

Description

An Actual Resources Connectivity (Ar-Cn) domain shows the communication of actual resource. It illustrates the actual resource configurations and actual relationships between them.

An Actual Resources Connectivity (Ar-Cn) domain (e.g., an organization chart for a department or agency) shows the structure of a real organization at a particular point in time.

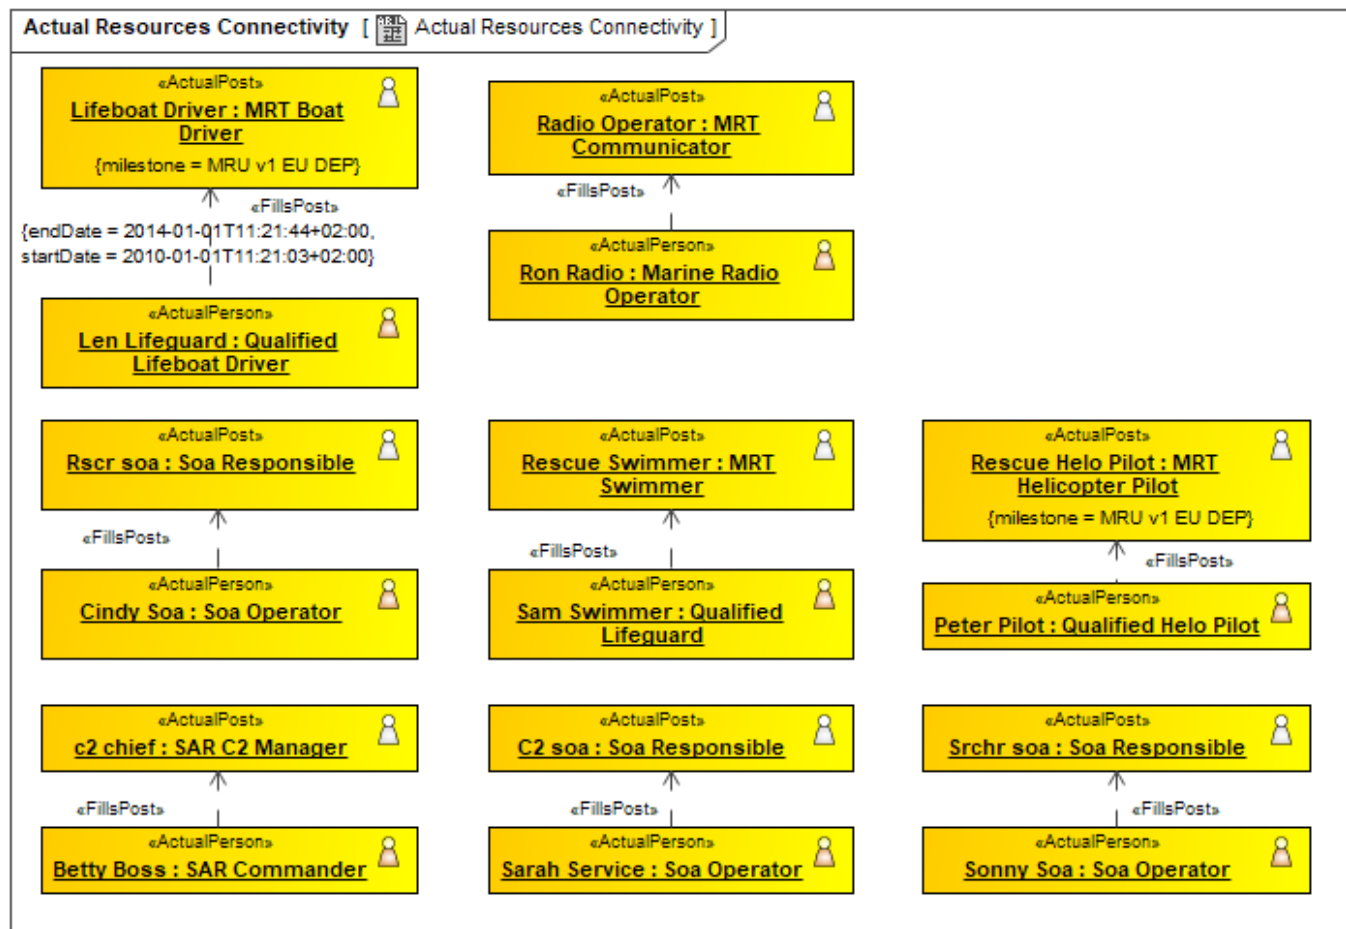

The intended usage of the actual form of the Actual Resources Connectivity (Ar-Cn) domain includes:

- Identify architecture stakeholders.
- Identify process owners.
- Illustrate current or future organization structures.

Implementation

Actual Resources Connectivity (Ar-Cn) domain is represented by [Actual Resources Connectivity diagram](#).
