

# Working with Strategic States diagram

To create a Strategic States diagram

---

1. Create or select a Desirer (for example, Capability, Operational Performer, Capability Configuration)
2. Create or select an Actual State.
3. Create a Desired Effect relationship between a Desirer and Actual State.
4. Create or select an Achiever (for example, Actual Organization, Actual Resource) to achieve the Actual State.
5. Create an Achieved Effect between an Achiever and Actual State.
