

Working with Capabilities to Actual Enduring Tasks Mapping matrix

The Capabilities to Actual Enduring Tasks Mapping (St-Tr) matrix shows the mapping between the Actual Enduring Tasks required and the Capabilities that those Actual Enduring Tasks support directly or using the [implied relations](#).

The Rows of this matrix are Capabilities and the columns are Actual Enduring Tasks.

To create a Operational Activities to Service Specifications Mapping matrix

- 1. Specify **Row Scope** (Capabilities);
- 2. Specify **Column Scope** (Actual Enduring Tasks);
- 3. Click .

Capabilities map to Actual Enduring Tasks using a Capability For Task relationship.

To map a Service Specification to a Capability

- 1. Double-click an empty intersection.

To remove the relation

- 1. Double-click a full intersection between the desired elements.
