

Working with Risks to Assets Mapping matrix

The Risks to Assets Mapping (Sc-Tr) matrix shows which risks are applicable to Asset Roles. The Rows of this matrix are Risks and the Columns are Assets.

To build the matrix

1. Specify the **Row Scope** (Risks);
2. Specify the **Column Scope** (Assets);
3. Click the **Refresh** button.

To map a Risks to an Assets

- Double-click the intersection between the desired elements.
- Right-click the intersection between the desired elements and select Affects.

To remove the relation from the matrix

- Double-click a full intersection between the desired elements.
