Creating Lr Programme to Capability Mapping matrix

Lr Programme to Capability Mapping describes the mapping of programs and projects to capabilities to show how the specific projects and program elements help to achieve a Capability.

The rows of this matrix are Projects and the columns are Capabilities.

To create an Lr Programme to Capability Mapping matrix

1. Specify **Row Scope** (Projects).
2. Specify **Column Scope** (Capabilities).
3. Click the **Rebuild** button.

Activity is part of Project ("Dependency") relationship and a part of Capability ("Maps To Capability") relationship). This transitive structure of relations maps Capabilities to Projects.

Project owns Actual Project that are related to Resources exhibiting capabilities.

Both transitive structures of relations map Capabilities to Projects. The mapping is displayed in the Matrix.
