

# Creating C7 Actual table

To create a C7 Actual table, do either

---

- Add a new property Sets by clicking the Add New button and select one or elements that have at least one Measurement Set defined (see [C7](#)), and then specify the values of each Actual Measurement in the table cells.
- Add the existing Actual Property Sets by clicking the **Add Existing** button.
- Add the missing Actual Measurements by clicking the **Add Missing Measurements** button to update model changes to the table.

The created instances are stored in the same location as the Actual Measurements table.
