

Actual Project Milestone Creation Wizard

The **Actual Project Milestone Creation Wizard** is used to define a new milestone for the selected project.

To open the **Actual Project Milestone Creation Wizard**

1. Open a AcV-2 (MODAF), [Lr Lines of Development](#) (NAF 4.0), NPV-1 (NAF), [PV-2](#) (DoDAF 2.0), [Projects Roadmap](#) (UAF).
2. Select a project.
3. Do one of the following:
 - On the diagram toolbar, click **Add New > Actual Project Milestone**.
 - On the selected project shortcut menu, click **Add new Actual Project Milestone**.
4. Select one of the available milestone kinds:
 - In Service
 - Deployed
 - No Longer Used
 - Out Of Service
 - Other

The **Actual Project Milestone Creation Wizard** opens.

The wizard consists of three steps:

- 1 [Actual Project Milestone name, kind, and date specification](#)
- 2 [Actual Project Milestone type specification](#)
- 3 [Project status specification at a particular Actual Project Milestone](#)

Actual Project Milestone name, kind, and date specification

In this step, you can specify a name of a new Actual Project Milestone you are creating.

You can select one of the Actual Project Milestone kinds, which are:

- In Service
- Deployed
- No Longer Used
- Out Of Service
- Other

Also you can set the Actual Project Milestone date and time that indicates the position of the milestone in the project time frame. For more information about date and time, see [Date and Time Settings dialog](#).

Actual Project Milestone Creation Wizard

Specify name, kind and date

Type name for the Actual Project Milestone of the selected kind. Specify exact date of the Milestone within the limits of the owning Project time frame.

1. **Specify Name, Kind and Date**

Actual Project Milestone type specification

You can select one (or both) of the given milestone types:

- DLOD Milestone
- DOTMLPF Milestone

You can create your own milestone type as well using the **Creation Mode** and selecting the **Create** button.

Actual Project Milestone Creation Wizard

Specify Actual Project Milestone type

Select the existing or create a new Actual Project Milestone type. Selected milestone type defines project threads and status indicators for each of the project threads for specifying project status at a particular milestone.

1. Specify Name, Kind and Date

2. Select Actual Project Milestone Type

3. Specify Project Status at a particular Milestone

Project status specification at a particular Actual Project Milestone

After creating a new Actual Project Milestone, you can apply the project status according to the selected milestone type. Each milestone type can have specific project threads and status indicators.

	DLOD Milestone type	DOTMLPF Milestone type
Project threads	<ul style="list-style-type: none"> Equipment Logistics Infrastructure Organization Doctrine/Concepts Information Personnel Training 	<ul style="list-style-type: none"> Doctrine Organization Training Materiel Leadership Personnel Facilities
Status indicators	<ul style="list-style-type: none"> DLOD Absent Not Required No Outstanding Issues Manageable Issues Critical Issues 	<ul style="list-style-type: none"> Materiel Solution Analysis Technology Development Engineering and Manufacturing Development Production & Deployment Operations & Support

You can also define you own milestone type with a custom set of project threads and status indicators.

To create project thread and status indicator

1. In the Project Thread area, click the **Add** button.
2. Specify the thread name.
3. In the Status Indicator area, click the **Add** button.
4. Specify the indicator name.
5. Click the **Fill Color** button.
6. In the **Color** dialog select the color and click **OK**.
The project thread and status indicator are created.

 To create a second thread with the same status indicators, select a previously created thread select the **Creation Mode** and click the **Clone** button. A new thread with previously defined status indicators is created.
