

Generating the SV-7 Actual table from the SV-7 Typical table

SV-7 Typical table can be instantiated by creating SV-7 Actual table.

To generate a SV-7 Actual table from a SV-7 Typical table

1. Create a SV-7 Resource Performance Typical Parameters Matrix with at least one measurable resource added.
2. On the diagram table toolbar, click the **Evaluate Measurements** button. A new SV-7 Actual table will be created.
3. Add actual values for all Actual Measurements in the SV-7 Resource Performance Actual Parameters Matrix.

For each Measurement in the SV-7 Typical table, an Actual Measurement is created and the row representing it is added into the SV-7 Actual table.

Evaluating the same measurements again, new SV-7 Actual Measures Matrix will be created.
