

MODAF. SV-6 Systems Data Exchange Matrix

Description

The Systems Data Exchange Matrix specifies the characteristics of the system data exchanged between systems. The focus is on data crossing the system boundary. An SV-6 focuses on the specific aspects of the system data flow and the system data content in a tabular format.

Implementation

SV-6 can be represented using:

- SV-6 table.
- SV-6 role-based table.

 Role-based table represents exchanges between Resource Roles(resource usages).

- SV-6 spreadsheet report.
