Building StV-6 matrix

The Operational Activity to Capability Mapping (StV-6) describes the mapping between the Capabilities required by an Enterprise and the Operational Activities that those Capabilities support directly or using the implied relations.

The rows of the matrix are Operational Activities and the columns are Capabilities.

To build a StV-6 matrix

1. Specify the rows scope (Operational Activities).
2. Specify the columns scope (Capabilities).
3. Click the Rebuild button.

Operational Activities maps to Capabilities using the Maps to Capability relationship.

To map Operational Activity to Capability, click the intersection between the desired elements and click one more time, the relation will be deleted.
