

# Building AcV-1 matrix

It is recommended to create an OV-4 before creating an AcV-1.

The AcV-1 is an editable matrix displaying the responsibility of Actual Organizational resources (Actual Organizations, Actual Posts, and Actual Person) for Actual Projects.

The rows in the AcV-1 Responsibility Matrix represent Actual Organizational resources (Actual Organizations, Actual Posts, and Actual Person) and the columns represent Actual Projects.

To build an AcV-1 matrix

---

1. Specify the **Row Scope** (Actual Organizations, Actual Posts, and Actual Person).
2. Specify the **Column Scope** (Actual Projects).
3. Click the **Rebuild** button.
