MODAF. AcV-2 Programme Timelines

Description

The AcV-2 view provides a timeline perspective on programmes.

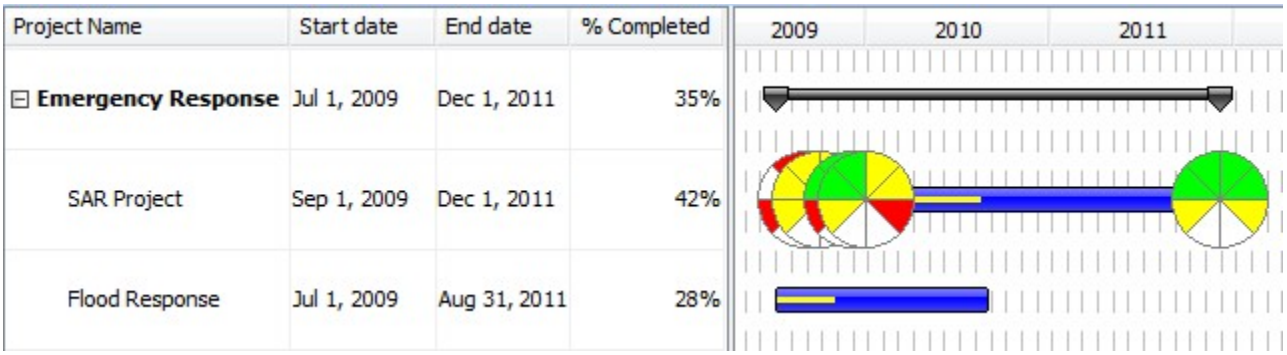

The AcV-2 View is intended primarily to support the acquisition and fielding processes including the management of dependencies between projects and the integration of all the DLODs to achieve a successfully integrated military capability.

For capability-based procurement, these work streams might conveniently be equated with Defence Lines of Development (DLODs).

Implementation

AcV-2 can be represented using an AcV-2 diagram which is realized as a Gantt Chart.

Acv-2 Programme Timelines

Related views

The use of AcV-2 should support the management of capability delivery and be aligned with the capability phasing view (StV-3), if one exists.
