Display sub capabilities deleted from NCV-3 chart

⚠️ The capability name becomes Italic when one or more sub capabilities are deleted from the chart.

To display only the selected sub capability

1. Select the capability which sub capabilities you want to restore.
2. From the selected capability's shortcut menu, select **Display Deleted From Chart** and do one of the following:
     - Select the sub capability you want to be displayed.
     - Select **Display All** to display all sub capabilities.
