

# Generating NSV-7 Actual table from NSV-7 Typical table

NSV-7 Typical table can be instantiated by creating NSV-7 Actual table.

To generate a NSV-7 Actual table from a NSV-7 Typical table

1. Create a NSV-7 System Typical Quality Requirements Description with at least one measurable resource added.
2. On the diagram table toolbar, click the **Evaluate Measurements** button. A new NSV-7 Actual table will be created.
3. Add actual values for all Actual Measurements in the NSV-7 System Actual Quality Requirements Description.

For each Measurement in the NSV-7 Typical table, an Actual Measurement is created and the row representing it is added into the NSV-7 Actual table.

Evaluating the same measurements again, new NSV-7 Actual Measures Matrix will be created.
