

Reset to defaults option

Click the **Reset to Defaults** button to reset data to the default settings, see figure below.

The image shows a screenshot of a software interface. At the top right, there is a rectangular button with a thin blue border containing the text "Reset to Defaults". The background of the interface is light gray.

The Reset to Defaults button.

- MagicDraw allows you to configure the report engine settings in three levels: (i) Environment option, (ii) global *config.xml*, and (iii) template *config.xml*.
- The template *config.xml*/configuration settings will override the environment option configuration settings, which will override the global *config.xml* configuration settings.
