

# Metrics tool

The Metrics tool allows templates to:

- Invoke the Metrics menu and calculate the Metric from its suite names.
- Set a filter.
- Retrieve row elements and the Metric value.

The Metrics Dialog.

Like other Custom tools, the Metrics tool '*metrictool.jar*' must be presented in the 'extensions' folder of the Report Wizard plugin. For further information on Custom tools and the installation, see [Custom tool](#).

To import the Metrics tool to a template, type this following code in the template:

```
#import('metrics', 'com.nomagic.reportwizard.tools.Metricstool')
```
