Editing long textual values

In case of editing a value that consists of several words, the value cell may seem too short. In order to avoid this inconvenience you can edit the property value in a dialog specially designated for typing long values.

To edit a textual value consisting of several words

1. Click an appropriate property value cell.
2. Click the Edit button (see the highlighted button in the following figure).
3. In the opened dialog, type a value and click **OK**.

There are some textual properties, whose values can keep text formatting settings. You can use the HTML editor in such cases. To use the HTML editor, select the **HTML** check box in the dialog opened for editing this special kind of textual property value.
