Customizing Perspectives

Perspective customization allows grouping of functional features into standard/expert modes. Customization also allows the user to hide unnecessary commands, making a modeling tool more convenient.

To open the Customize Perspectives dialog

- From the Options menu, choose Perspectives and then Customize.
- In the Perspectives dialog, click the Customize button.

There are seven customizable areas in different perspectives:

- Main menu
- Main toolbars
- Diagram toolbars
- · Diagram modeling elements toolbar
- Smart manipulators
- Shortcut menu actions
- Create Diagram dialog

Each of these areas has a set of commands, which can be shown in the standard / expert mode or hidden.

To customize the selected area in a predefined perspective

- 1. In the **Customize Perspectives** dialog, select the perspective and click the **Edit** button near the selected area. The appropriate **Customize** di alog opens.
- 2. Expand tree sections and select radio buttons beside the items in the tree depending on your choice for **Standard and Expert**, **Expert** only or **Hidden** modes.
- 3. Click **OK** when you are done.

To switch between Standard/Expert modes, do one of the following

- From the toolbar shortcut menu, select/clear the Expert Menu Mode or Expert Toolbar Mode check box.
- From the diagram palette shortcut menu, select/clear Expert Mode check box.
