

Adding the license to Teamwork Server

On this page

- [Adding the license key](#)
- [Adding the license key from a command line](#)

Adding the license key

1. In the **Teamwork Server License Manager** dialog, click the **Select License Key Files** button.
2. In the **Select License Key File** dialog, select the license key file.
3. Click **Open**.

check the license information at a later time, click the **License Manager** button in the Teamwork Server dialog.

Adding the license key from a command line

1. Run the following:

```
For Windows: $teamwork_install_dir/bin/teamwork_server_nogui.exe  
For UNIX/Linux: $teamwork_install_dir/bin/teamwork_server_nogui
```

2. Type the path to the license key file and the file name (for example, *C:\key\MagicDraw_18_4_TeamworkServer_key.txt*) and press Enter.
3. Press *y* and Enter, to apply the key.
4. Do one of the following:
 - Press *y*, if you want to import the configuration files. In this case, you will be asked to enter the previous installation path.

When choosing to import the configuration files, you can choose one of the following:

- Press *n*, if you do not want to import the configuration files.
 - Press *y* and then Enter if you want to start the Teamwork Server with administrative permissions.
 - Press *n* and then Enter if you want to start the Teamwork Server without administrative permissions.
